Art Unit: 3611

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: second gear input shaft 3. The proposed drawings correction shows element 3 pointing to the flexible belt that connects the motor to the harmonic drive. It appears that the "second shaft" claimed corresponds to a portion of the eccentric core 12, or to the motor output shaft 32. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

2. Claims 45, 46, 52, and 54 withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on October 08, 2009.

Applicant argues that unity of invention cannot be lacking if there is only one independent claim. The examiner disagrees. Lack of unity cannot be asserted if the independent claim or claims are allowable, thereby showing that there is one unifying inventive concept. However, if the independent claim is not allowable, lack of unity may

Art Unit: 3611

exist. In the present case, independent claim 27 is generic to the species, but it is not allowable. Therefore, it does not establish unity of invention.

3. Claims 47 and 48 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Applicant's original disclosure did not describe a current supply or motor signal forwarded without a "transfer device" or without sliders and flat spiral springs. The overall disclosure seems to show an arrangement that does not need a transfer device that extends through the harmonic drive. However, it does not show an arrangement that does not require a transfer device at all. Clearly, the motor will need some mechanism for receiving signals and current. Therefore, the claims appear to misstate the invention.

4. Claims 27-44, 47-51, and 53 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In each of the independent claims, applicant recites "the servomotor supports a torque on one of (a) another component...". This appears to be a misstatement of the disclosed invention. Applicant disclosed a motor mounted to a component other than the steering shaft. It does not discuss a "servomotor supports a torque".

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3611

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 27-53 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

7. In each of the independent claims, applicant recites a

8. Applicant's arguments filed 5/18/2010 have been fully considered but they are not persuasive.

Applicant's arguments with respect to the prior art are convincing and the rejection based on 35 USC 102 is withdrawn.

It is noted that claim 54 is withdrawn. It does not properly depend from claim 29 because it includes structure to a mutually exclusive embodiment. therefore, a complete response to this Office Action should include cancellation of claim 54.

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 3611

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
